

# Periodic Maintenance Programs

Periodic maintenance is critical in maximizing the longevity of your mechanical system investment.

Proper maintenance can increase system efficiency, improve indoor air quality, and reduce premature equipment failures.

William E. Walter, Inc. offers a wide range of maintenance programs:

- Programs individually tailored to meet or exceed your equipment's manufacturer recommended maintenance needs and site specific requirements.
- Automated periodic maintenance generation ensures that the proper inspections are completed in a timely manner, maximizing maintenance effectiveness.
- Complete written reports documenting the services that have been performed.
- Local and state mandated inspection services:
  - ✓ Boiler CSD-1 (Control Safety Device) inspection and certification
  - ✓ Hydrostatic boiler testing and internal inspections
  - ✓ Backflow (Reverse Pressure Zone) testing and certification

At William E. Walter, Inc., we want to be your contractor of choice and provide you with the best possible array of periodic maintenance services.
